[Updating Chapter Two of the Rainwater and Land Development Manual - Events - Water Management Association of Ohio \(wmao.org\)](#)

**Updating Chapter Two of the *Rainwater and Land Development Manual***

*Rainwater and Land Development* is the resource that provides Ohio's technical standards for urban stormwater management. Chapter 2 of the manual specifically covers managing post-construction stormwater runoff from a development and is currently being updated. This webinar will present proposed and future changes to the technical material in Chapter 2, focusing on the addition of the runoff reduction practice standards to the chapter and how to apply and design these practices given current *Rainwater and Land Development* guidance. The webinar will continue to seek input for these and other future technical updates.

The webinar will be applicable to designers and plan reviewers as well as developers, contractors, and individuals interested to learn about post-construction stormwater management practices and their design.

**Speaker: Justin Reinhart, PE, Stormwater Technical Assistance, Ohio EPA Division of Surface Water**
