## Post-Construction BMP Options for Roadway Projects with Jon Prier, Ohio Department of Transportation

Roadway construction projects require post-construction BMPs just like normal site development. However, due to the linear nature of roadway construction, ODOT has additional BMPs beyond those included in Ohio EPA's Construction General Permit. This webinar will discuss transportation specific BMPs and implementation of those BMPs for designers new to roadway BMPs or those involved in project reviews.

Speaker: **Jon Prier, PE**

Environmental Hydraulic Engineer  
Ohio Department of Transportation

Jon Prier has been working as an environmental engineer in Columbus for over 15 years. He specializes in stormwater management planning, modeling, BMPs, and permit compliance and has experience working with facilities across the country. Jon works for the Ohio Department of Transportation focusing on off-site mitigation and stormwater permit requirements as well as coordinating with Ohio EPA.

Thank you to OSWA sponsors:
